

Tourist Blockchain Game

Overview:-

Tourist blockchain game is worked on basis of play to earn algorithm(P2E).A blockchain game inspired by axie infinity that contains majority of functions matched axie infinity game and some more functions has been added by Tourist team after examined axie infinity and noticed some improvements.

Connect Wallet:-

User will be require to connect his bsc wallet to a blockchain game by clicking on “Connect Wallet” button.See reference #001 below.

Reference #001

In Game Wallet:-

After connecting your compatible wallet, user will be required to deposit \$Tourist tokens. User can deposit \$Tourist tokens by (In Game Wallet). See reference #002 below.

Reference #002

Minimum match to play a game has been set to 5 Billion \$Tourist tokens, as it is written in contract at Tourist Shiba Inu White Paper (<https://touristshibainu.com/wp-content/uploads/2022/06/Tourist-Shiba-Inu-v1-WhitePaper.pdf>) about tax system. Make sure to deposit \$Tourist tokens according to tax system rules.

Arena:-

There are 3 Arena's in Tourist blockchain game. Beautiful graphical

work has been done here. User can choose his/her desire arena to play a game. See reference #003 below.

Reference #003

NFT:-

User can see our blockchain characters by clicking on nft button. We have setup a (Purchase Button), by clicking on purchase button, user will be redirected towards our nft collection page at opensea where user can purchase character nfts as well as card nfts. Opensea web link (<https://opensea.io/collection/touristshibainu-collection-282523380>).

Difference between Character NFT and Card NFT:-

User must need to hold atleast one character nft and atleast one card nft.Character nfts are Tourist blockchain game main characters that will fight with opposite party.Card nfts are characters powers or assets that will help attacking opposite party.There are 7 characters and 4 cards nfts.

Character nft's:-

Names	Powers
1) Floki TouristShibaToshi	6% Attack
2) Alien TouristShibaToshi	9% Attack
3) Cyber TouristShibaToshi	11% Attack
4) Harry TouristShibaToshi	16% Attack
5) Deadpool TouristShibaToshi	22% Attack
6) Robo TouristShibaToshi	24% Attack
7) Mummy TouristShibaToshi	31% Attack

Card nft's:-

Names	Powers
1) Health Card	Increase health of characters
2) Lightning Card	Attack with lightning power
3) Xarc-Bomb Card	Attack with bomb power
4) Shield Card	Save from other party attack for 20 seconds

Properties:-

Virtual properties are limited properties (777 Lands). We are going to bring Tourist metaverse very soon. User would be able to build homes, assets or whatever they want on their lands and will be able to list their assets on Tourist Metaverse marketplace for sell purpose. User can purchase virtual properties by clicking on “Properties” button. See reference #004 below.

Reference #004

GamePlay:-

Two teams will compete with each other, called (Peer to Peer Match). Lets suppose if there is a match of 5 billion \$Tourists, winner will get 9 billion tokens and remaining 1 billion will be use for Tourist Shiba Inu project growth purpose. There should be atleast one character NFT and atleast one card NFT in his/her wallet to play a game. There are different powers for different characters NFT as described above. User needs to click his purchasable assets to attack opponent party.

- | | |
|-------------------|---|
| 1) Health Card | Increase health of characters |
| 2) Lightning Card | Attack with lightning power |
| 3) Xarc-Bomb Card | Attack with bomb power |
| 4) Shield Card | Save from other party attack for 20 seconds |

Winning tip:-

1) Purchase character NFT with good attacking powers (Attacking power ratio has been described above in (NFT) section).

2) Purchase all card NFT's so you would be having all attacking assets that would help in winning. See reference #005 below

3) If opponent party uses shield asset to protect his characters from attack. Dont attack with xarc-bomb asset or lightning asset as it will not effect on other party. At that moment if you have Health asset or Shield asset, use it.

Conclusion:-

Tourist Shiba Inu is not just a meme token. Tourist Shiba Inu team is doing full effort to bring lot of products to the cryptocurrency market (Blockchain Games, Metaverse, Nft's etc) and thus helps growing Tourist Shiba Inu project. We promise our community that we will do our best to bring huge users from crypto market with the help of our blockchain game to boost our project. Thank you
